Experience

02/04/2022 – 05/09/2022

Frontend Developer (Intern) / Preneur Lab

- Built static websites using HTML5, CSS3, JavaScript and Reactjs.
- Worked with the company API to fetch and use data from the database.
- Learned about unit testing from the senior developers.
- Documentation and commenting.

Personal Projects

- [smartBrain](#): Built with React, uses Tachyons for styling and particlesJS for the animated background and of course the Fetch API from Clarifai which uses AI to detect faces.
- [robofriends](#): Built with React, uses library Tachyons for styling and RoboHash to generate the robots.
- [Budgets](#): Built with React and React-Bootstrap. It uses the local storage to store data, so, even after refreshing the page your data is still there.
- [forkify](#): A modern application made with the forkify API. It also uses the local storage to store data.
- [mapty](#): A modern application made with the Geolocation API. It also uses the local storage to store data.
- [BANKIST](#): A marketing website for a fictional bank made with HTML, CSS and JavaScript.
